6th Grade - Lesson Plan to be embedded into Science Curriculum about Risky Behaviors that affect Health.

6.5 D Health behaviors. The student engages in behaviors that reduce health risks throughout the life span. The student is expected to: D) explain the relationship between tobacco, alcohol, drugs, and other substances and the role these items play in unsafe situations such as drinking and driving and Human Immunodeficiency Virus (HIV)/Sexually Transmitted Disease (STD) transmission;

Teacher Prep: Watch the video and read the accompanying Teacher Guide.

Guiding Question: How can I reduce health risks, including getting HIV or an STD, by engaging in safe behaviors and making smart choices?

Engage: Teacher shows film clip - Discovery Learning: HIV & AIDS-Staying Safe Video

Explore: Students create a T-chart for Safe vs Risky Behaviors.

Explain: Teacher shows powerpoint.

Evaluate: Students take quiz.
