August 24, 2015

Dear Parents,

In physical education, safety is a top priority. We are requesting that your child wear athletic shoes during physical education classes and recess. Athletic shoes are defined as shoes with soles that are less than 1” in height, shoes that tie or have Velcro straps, shoes that are closed around the entire foot, and shoes that do not have wheels. Sandals, flip-flops, boots and other non-athletic shoes are not conducive to the activities the students perform in physical education classes. Athletic shoes reduce the chances of an injury to your child.

Athletic shoes may be worn to school all the time. However, if a student chooses to wear other shoes, he/she may keep the athletic shoes at school. For safety reasons, we strongly encourage all students to wear athletic shoes during physical education or recess.

We appreciate your support of athletic shoes for the safety of our children.

Sincerely,

Tammy Daggs
Coordinator of Educational Support Services, Physical Education and Health
